## Response to Amendment

1. Applicant's arguments filed on 4/11/2005 regarding claims 18-19, 22-23 have been considered. Claims 1-17, 20-21, 24-25 have been canceled by the Applicant.

## EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a receiver for use in a time division multiplex communication system that comprises a successive interference cancellation joint detection (SIC-JD) device, including the unique components of "a first matched filter for processing the baseband signal to match symbol responses of the data signals in the first group; and a second matched filter for processing the subtracted signal to match symbol responses of the data signals in the second group; and wherein an output of the first and second joint detection blocks are soft symbols, the device further comprising a first and second soft to hard decision block converting the first and second joint detection block outputs into hard symbols." The closet prior art, Laakso et al. (USP 5,933,423), discloses a reception method and a receiver in a cellular radio system that is used to detect received signals in an advantageous manner in the event of multiple access interference without unduly massive calculations. However, Laakso fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
